MEMORANDUM FOR : Mr. James Q. Reber

SUBJECT : Talent Clearances for Hycon Personnel

1. It is requested that Talent clearance be obtained for the following listed Hycon personnel who are presently on duty with our Detachments overseas:

2. These individuals have a need to view processed negatives from our flights in order that malfunctions in camera equipment can be recognized and corrected before another mission is dispatched. If they cannot view the film at the Detachment where they are located unnecessary delay is experienced in receiving information from Project Headquarters when poor photographic coverage is obtained. Furthermore, interpretation of photographic data  generally does not cover equipment malfunctions but merely assays film for photo intelligence. Only by timely analysis of the negatives by the photo equipment technicians can we expect to improve the qualify of our photography.

25X1

3. It is requested that Project Headquarters be informed of action taken with regard to these clearances.

Deputy Project Director
